

WHAT IS CLAIMED IS:

1. A user interface comprising:
 - an entity selection area allowing selection of at least one corporate entity from a
 - 5 plurality of corporate entities; and
 - a plurality of selectable elements, each of the selectable elements being selectable to cause presentation of an associated area,
 - wherein an area associated with each of the plurality of selectable elements presents information relating to the at least one corporate entity and to the associated selectable
 - 10 element.
2. A user interface according to Claim 1, wherein at least one of the plurality of entities is related to at least one other of the plurality of entities.
- 15 3. A user interface according to Claim 2, wherein the relation is graphically presented in the entity selection area.
4. A user interface according to Claim 1, wherein the information relating to the associated selectable elements comprises one or more of:
 - 20 information relating to a formation of the at least one corporate entity;
 - a location of corporate documents relating to the at least one corporate entity;
 - contact information relating to the at least one corporate entity;
 - ownership information relating to the at least one corporate entity;
 - information relating to regulators of the at least one corporate entity;
 - 25 information relating to officers of the at least one corporate entity;

information relating to jurisdictions in which the at least one corporate entity is qualified to do business;

information relating to reports filed or to be filed on behalf of the at least one corporate entity;

5 controllers information relating to the at least one corporate entity; and
 funds information relating to the at least one corporate entity.

 5. A user interface according to Claim 1, further comprising:
 a document generation area for receiving instructions to generate a document
10 including information relating to the at least one corporate entity.

 6. A user interface according to Claim 5, wherein one of the plurality of selectable elements is selectable to cause presentation of the document generation area.

15 7. A user interface according to Claim 1, wherein at least one associated area allows editing of the information presented therein.

 8. A user interface according to Claim 7, wherein the at least one associated area allows the editing based on editing rights of a user to whom the interface is presented.
20

 9. A user interface according to Claim 7, wherein the at least one associated area presents information indicating an editor of the presented information and a date on which the presented information was edited.

25 10. A user interface according to Claim 1, wherein at least one associated area presents an indication that information presented therein is in the process of being edited.

11. A user interface according to Claim 1,
wherein at least one of the plurality of selectable elements is selectable to cause
presentation of an area presenting images of documents relating to the at least one corporate
5 entity.

12. A user interface for presenting corporate information, comprising:
an entity selection area allowing selection of at least one corporate entity from a
plurality of corporate entities;
10 a formation information area for presenting information relating to a formation of the
at least one corporate entity;
a document area for presenting a location of corporate documents relating to the at
least one corporate entity;
a contacts area for presenting contact information relating to the at least one
15 corporate entity;
an owners area for presenting ownership information relating to the at least one
corporate entity;
a regulators area for presenting information relating to regulators of the at least one
corporate entity;
20 an officers area for presenting information relating to officers of the at least one
corporate entity;
a jurisdiction area for presenting information relating to jurisdictions in which the at
least one corporate entity is qualified to do business;
a reporting area for presenting information relating to reports filed or to be filed on
25 behalf of the at least one corporate entity;

a controllers area for presenting controllers information relating to the at least one corporate entity; and

a funds area for presenting funds information relating to the at least one corporate entity.

5

13. A method comprising:

presenting a plurality of selectable elements and an entity selection area, the entity selection area allowing selection of at least one corporate entity from a plurality of corporate entities;

10 receiving a selection of the at least one corporate entity;

receiving a selection of one of the plurality of selectable elements;

determining information associated with the at least one corporate entity and the one selected element; and

presenting the determined information to a user.

15

14. A method according to Claim 13, wherein at least one of the plurality of entities is related to at least one other of the plurality of entities, and further comprising:

graphically presenting the relation in the entity selection area.

20 15. A method according to Claim 13, wherein the determined information comprises one or more of:

information relating to a formation of the at least one corporate entity;

a location of corporate documents relating to the at least one corporate entity;

contact information relating to the at least one corporate entity;

25 ownership information relating to the at least one corporate entity;

information relating to regulators of the at least one corporate entity;
information relating to officers of the at least one corporate entity;
information relating to jurisdictions in which the at least one corporate entity is
qualified to do business;

5 information relating to reports filed or to be filed on behalf of the at least one
corporate entity;

 controllers information relating to the at least one corporate entity; and

 funds information relating to the at least one corporate entity.

10 16. A method according to Claim 13, further comprising:
 receiving instructions to generate a document including document information
relating to the at least one corporate entity;

 determining the document information;

 generating the document; and

15 presenting the document to the user.

 17. A method according to Claim 13, further comprising:

 receiving instructions to edit the determined information;

 determining whether the user is authorized to edit the determined information; and

20 editing the determined information if it is determined that the user is authorized to
edit the determined information.

 18. A method according to Claim 17, further comprising:

 associating information identifying the user with the edited information.

25

19. A method according to Claim 17, further comprising:
presenting an indication that the determined information is in the process of being
edited.

5 20. A method according to Claim 13, further comprising:
 associating information identifying a date on which the information was edited with
the edited information.

 21. A method according to Claim 13, further comprising:
10 receiving a request for an image of a document relating to the at least one corporate
entity; and
 presenting the image to the user.

 22. A medium storing processor-executable process steps, the process steps
15 comprising:
 a step to present a plurality of selectable elements and an entity selection area, the
entity selection area allowing selection of at least one corporate entity from a plurality of
corporate entities;
 a step to receive a selection of the at least one corporate entity;
20 a step to receive a selection of one of the plurality of selectable elements;
 a step to determine information associated with the at least one corporate entity and
the one selected element; and
 a step to present the determined information to a user.

23. A medium according to Claim 22, wherein at least one of the plurality of entities is related to at least one other of the plurality of entities, and the process steps further comprising:

a step to graphically present the relation in the entity selection area.

5

24. A medium according to Claim 22, wherein the determined information comprises one or more of:

information relating to a formation of the at least one corporate entity;

a location of corporate documents relating to the at least one corporate entity;

10 contact information relating to the at least one corporate entity;

ownership information relating to the at least one corporate entity;

information relating to regulators of the at least one corporate entity;

information relating to officers of the at least one corporate entity;

15 information relating to jurisdictions in which the at least one corporate entity is qualified to do business;

information relating to reports filed or to be filed on behalf of the at least one corporate entity;

controllers information relating to the at least one corporate entity; and

funds information relating to the at least one corporate entity.

20

25. A medium according to Claim 22, the process steps further comprising:

a step to receive instructions to generate a document including document information relating to the at least one corporate entity;

a step to determine the document information;

25 a step to generate the document; and

a step to present the document to the user.

26. A medium according to Claim 22, the process steps further comprising:

a step to receive instructions to edit the determined information;

5 a step to determine whether the user is authorized to edit the determined information;
and

a step to edit the determined information if it is determined that the user is authorized
to edit the determined information.

10 27. A medium according to Claim 26, the process steps further comprising:

a step to associate information identifying the user with the edited information.

28. A medium according to Claim 26, the process steps further comprising:

15 a step to present an indication that the determined information is in the process of
being edited.

29. A medium according to Claim 22, the process steps further comprising:

a step to associate information identifying a date on which the information was
edited with the edited information.

20

30. A medium according to Claim 22, the process steps further comprising:

a step to receive a request for an image of a document relating to the at least one
corporate entity; and

a step to present the image to the user.

25

31. An apparatus to manage corporate entities, comprising:
a processor; and
a storage device in communication with said processor and storing instructions adapted to be executed by said processor to:

- 5 present a plurality of selectable elements and an entity selection area allowing selection of at least one corporate entity from a plurality of corporate entities;
 receive a selection of the at least one corporate entity;
 receive a selection of one of the plurality of selectable elements;
 determine information associated with the at least one corporate entity and
10 the one selectable element; and
 present the determined information to a user.
